Erecting the Desert Fox 2 Tent

Erecting the Desert Fox 2 tent is very easy and very straight forward.

Unpack the tent and determine which is the inner tent - this goes up first. Lay the inner tent out on the ground. Locate the four corner pegging points at the corners of the floor, and peg these down to form a nice, even, symmetrical rectangle.

After slotting the aluminium poles together, simply locate the pole ends into the metal eyelets on the opposite (diagonal) corners of the inner tent floor. Then clip the inner tent to these poles. Then, using the two ties at the apex, tie together to hold the poles firmly in place.

It is now simply a matter of throwing the flysheet over the top, making sure that the front and back of the flysheet (with the entrances) line up with the entrances of the inner tent. Tie the flysheet to the poles with ties on the inside of the flysheet if and where necessary.

Peg out the flysheet to provide a nice, taut even shape... and that's it!

Attach and peg out the additional guylines if required.

IMPORTANT:

We would strongly advise that you erect your new tent at the earliest possible opportunity and certainly well before you intend to use it in the field, in order to fully inspect the tent and its components, and indeed gain some experience of setting it up in a 'no pressure' situation. Usually after rough pegging, it is possible to tweak and fine tune your tent to provide a nice taut shape by adjusting the corner tension straps and/or slightly altering pegging points. Make sure all the zippers on both the inner tent and the flysheet are all done up before attempting to erect, this way the tent will maintain its true shape whilst pegging out.

If you are at all unhappy with the product, or in the unlikely event that you receive a faulty product, then please contact us immediately via email and allow us to resolve any issues: station13@btinternet.com

Your custom and indeed your satisfaction is extremely important to us as we endeavour to develop a reputation for providing high quality, high performance products, fast and free delivery, along with great customer service.

Kind regards, Stephen.
